

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0021] starting at page 10, line 11 as follows:

[0021] The porogen used in the present invention may be any of the pore-generating compounds well knew known in the art, which can be exemplified by, but are not limited to, cyclodextrin, polycaprolactone, and derivatives thereof. The porogen is mixed with the inventive siloxane-based resin so that weight ratio of the porogen to the resin is 1:99-70:30, wherein both porogen and resin are in the form of solid powder.
